WORK EXPERIENCE

Junior Developer - Php
I Vision Infotech

Nov 2021 - May 2024

As a developer at I Vision Infotech, I gain hands-on experience in Core PHP, focusing on developing dynamic and robust web applications. My work includes key areas such as database integration, form handling, session management, file operations, and PHP architecture. I collaborate with a team of professionals, continuously improving my skills in back-end development.

Learning React JS

Tops Technologies

May 2024 - Present

As a React JS developer, I have gained essential skills to build dynamic, high-performance web applications using React.js, a popular JavaScript library for front-end development. I am proficient in core concepts like components, state management, props, hooks, and routing. Through hands-on projects, I have developed the ability to create interactive user interfaces and efficiently manage application states.
